PROFESSIONAL SUMMARY

Technical Game Designer and Gameplay Engineer specializing in rapidly prototyping gameplay mechanics and scripting unique experiences in Unity. Shipped an online multiplayer title independently on PC and a mobile action platformer on the iOS and Google Play store. My intention is to design games that are both memorable and enjoyable for the players' experience.

EDUCATION

Wentworth Institute of Technology, Boston, MA

Expected Summer 2027

Computer Science Bachelor of Science | Minor in Game Development and Design | GPA: 3.987/4.0

Coursework: Video Game Physics, Linear Algebra and Matrix Theory Math, Software Engineering, Machine Learning, AI Ethics

WORK EXPERIENCE

MassDiGI Games: Drop Off Dragon, Designer, Build Master

May 2026 – July 2026

Level Design: Designed and iterated over a complete 10 levels, utilizing an extensive Level Design Document.

- **Iterative Design:** Paper-prototyped levels to clearly and implicitly communicate intended paths for inexperienced players.
- **Text-based Scripting:** Scripted a dynamic cross-fading music and low-pass filter system called using FMOD integration for seamless music changes.
- **Teamwork Collaboration:** Collaborated with 2 other build masters to execute successful mobile app builds for the iOS and Google Play Store.
- **Design Documents:** Wrote a detailed 3 page design document, for future transfer of project ownership at the end of internship.

PROJECTS

Fobia Fights, Solo Developer

Dec 2024 – Aug 2026

Unity 2D, C# | Online-multiplayer, PvP, Steam | Solo

- Acquired 300+ wishlists and made over \$100 after release.
- Prototyped and internally playtested a combat system that was both competitive and easy to pick up, utilizing elements of stealth, precise timing, and unique loadouts.
- Programmed multiplayer networking support using Photon and Steamworks.NET, implementing online matchmaking, room creation, and public/private lobbies.

POPUP://TOWER, Lead Technical Designer, Programmer

July 2026 – July 2026

Unity 3D, C# | Minigames, Wario-ware, Incremental | 6-person design team

- Conceptualized and designed a dynamic difficulty system that exponentially increased quantities of minigames as players progress up an infinite tower.

Perpetual Stew, Lead Programmer

July 2025 – Aug 2025

Unity 2D, C# | Cooking Simulation and Time-management | 3-person engineering team

- Led development of our engineering team to deliver core gameplay mechanics within a short deadline using Kanban.
- Coordinated with 20+ designers, artists, and audio specialists to streamline workflows, utilizing version control.

Fingers of Fate, Gameplay Programmer, Designer

Oct 2024 – Oct 2024

Unity 2D, C# | Wave-based, Survival | 2-person development team

- Prototyped and implemented core gameplay systems such as melee combat, a scalable “finger” ability system, and a wave-based progression system.
- Implemented and iterated upon multiple enemy AI behaviors that cause players to combat their unique attack patterns.

SKILLS

Technical: Unity, Unreal Engine 5, C#, Lua, C, Java, Miro, Github, PlasticSCM, Visual Studio, Photon

Game Design: Visual and text-based scripting, Paper and in-engine prototyping

HONORS & AWARDS

- GMTK Game Jam 2026, 27th Most Popular Game
- GMTK Game Jam 2026 Ranked #336 of 10,562 Enjoyment
- National Latin Exam 2022: Magna Cum Laude
